A vibration-dampening floor helps smooth out the roughest rides, and a deep-V hull design ensures maximum stability.

Honda Honwave Air V-floor Inflatables

A revolutionary floor for a truly moving performance!

Light and fast, these inflatables are packed with comfort and performance features. Their vibration-dampening floors help to smooth out the roughest rides. Their deep-V hull design significantly optimises keel performance and ensures maximum stability at virtually any speed. The hull design incorporates extended rear inflated floor trim pads, for effortless directional agility, responsive helm balance and increased buoyancy allowing higher four-stroke engines. .

Make the good even better
